OPTIMA
POWER

About us

OPTIMA Power doo provide services of transportation of all kinds of goods in domestic and international standard and special transport, technical support for special transportation, securing licenses for special transportation as well as all types of freight forwarding services.

- Our company organizes the transportation of goods and offers logistical support for all types of water transport, river, maritime and ocean. Efficient transportation of goods by water transport requires the inclusion of other modes of transport.

- Within our reliable integrated solutions, we provide you with the services of an organization air transport for the whole world.

Transfers offers you the best air travel solutions - fast, reliable and secure. Whether it is a charter or a regular service, we have the right offer for you. Our team tracks the shipment 24/7 and will provide you with feedback on arrival as well as the current status of the shipment.

- We are proud to point out that our transport fleet has over 50 transport units.

Standard domestic and international transport

We have a large number of our own vehicles for the transport of goods of various dimensions and cooperate with carriers around the world, so that we are able to arrange for any destination of land transport of goods as soon as possible.

Special transport

Optima Power Ltd. is also capable of providing oversized / special cargo transportation services. In this area we offer solutions of the highest standards and services of transport with special vehicles, especially for power industry.

In the course of special transport we are guided by the basic principle, which is the safety of all participants as well as the goods themselves, which we achieve through preventive action and long experience of employed drivers, as well as adequate insurance.

Mobile cranes

Our business and business segment to which we continue to attach high importance are mobile cranes. In this part we offer services of lifting and cargo handling up to 1100 tons, and height over 120 meters. The very choice of our equipment is an indicator of how much we strive for leadership in this region and beyond, because by selecting the best and highest quality cranes and personnel, we are able to satisfy even the most demanding clients.

Our professional and friendly staff has all the necessary certificates and permits for management, and we achieve safety at work and only the performance of work with certified and certified equipment.

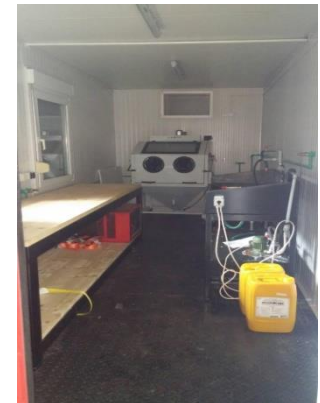

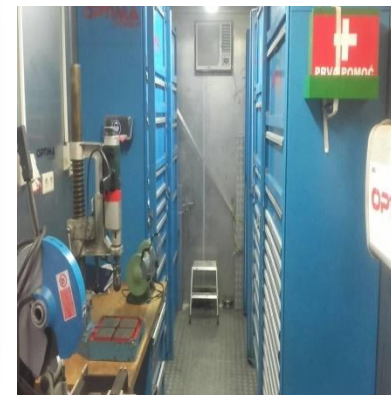

When it comes to lifting and handling loads, rest assured that we are the best.
